

The Legend of NIAN

When player attaches the monster to the cave, the entire cave flips around, insinuating that Nian has escaped into the wilderness, revealing the end of the story

Ancient Chinese gateway build simply for decoration, adding to the world building

Visual cues design: steppingstones in shape of ying Yangs, guiding players to follow the storyline

Firecracker guy

Stairs for visual cue, leading players up the ramp

Sliding door mechanism that turns on the LED light

Drum girl

When player pops the monster in the copper taped hole, it activates the woman to play the drums very loudly, pushing the storyline ahead

When pushed, the mechanism underneath Nian also pushes the children away and rotate them, revealing the ghost side, insinuating that the children are eaten.

Lantern man

Cool cat

Unfortunate children

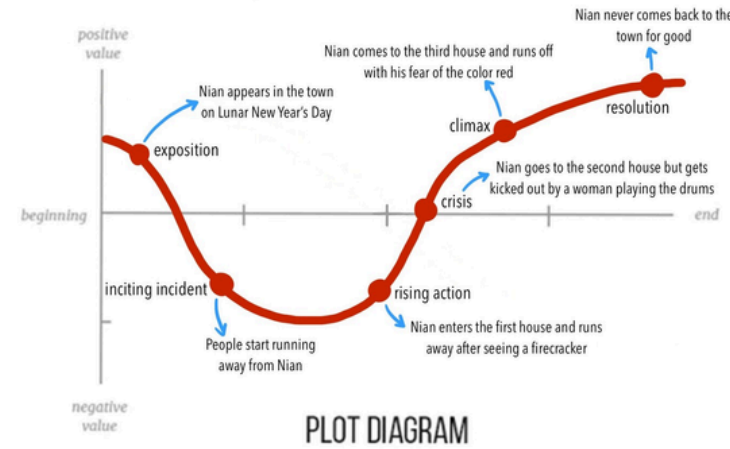

Monster Nian

Ancient Chinese cloud designs on the box to hide all the wires and breadboards, emphasis on aesthetics
